SUMMARY

I am a Front-End Developer with over 6 years of experience in designing and implementing scalable web solutions. My work focuses on enhancing user experience while ensuring high performance and client satisfaction. I have worked on a variety of projects for global clients, delivering modern, responsive, and user-friendly web applications.

PROJECTS

Ella3eeb (<https://ella3eeb.com>) May 2026

- Built a native-feeling "App-within-Browser" UI using Next.js 15 and Framer Motion.
- Implemented real-time notifications and secure TPay OTP authentication via Pusher.
- Architected a scalable multilingual platform with dynamic RTL/LTR and TanStack Query.

Furtera (<https://frutera-farms.com>) Apr 2026

- Engineered a component-based Next.js UI with touch-optimized Framer Motion interactions.
- Built a centralized API wrapper for automated locale injection and REST normalization.
- Implemented a fully localized (i18n) platform using next-intl for seamless multilingual support.

Infinty Builder (<https://ai-website-builder-client-xi.vercel.app/>) Aug 2025

- Engineered a full-stack AI website builder using React, Vite, and Express.
 - Integrated OpenAI API for dynamic, automated content and UI generation.
 - Implemented secure authentication and robust data management with Prisma and PostgreSQL.
-

EDUCATION

Route Acadmy C39 | Full-Stack

- I completed a Full-Stack track where I specialized in React for the Frontend and Node.js for the Backend.
-

LANGUAGES

- **Arabic:** Native speaker
